

## **Custom Door Components™ 20 Minute 1-3/4" Profiled Core Fire Door**

The manufacturing procedures for 20 minute profiled core specifically state that the core material must meet the following:

Minimum 1-1/2" thick  
LD-2 Particleboard Door Core (33 lb per cubic ft)

The core assembly shall be stamped as shown in the sample below:

MDrSys  
20 W.P.C.  
WH

The Components Division of Custom Door Components can manufacture and supply material to meet your 20 minute 1-3/4" profiled fire core needs. The particleboard can be ordered profiled or flush to be profiled at your location.

(There are currently no 20 minute fire approvals for Profiled 1-3/8" doors).

Mixed orders are always available at Custom Door Components. Place your orders for Particleboard, Profiled Particleboard, Lockblocks, Mineral Core and Profiled Mineral Core in any combination.
