

### SCS CERTIFICATION

Custom Door Components™ is pleased to announce that all of our particleboard products, (flush core, lockblocks and profile core) have been certified by Scientific Certification Systems (SCS) to receive a “Minimum 70% recovered wood fiber” label.

With this certification you are now able to gain SCS certification on your doors, or make the claim that “the core in these doors is made with 70% recovered wood fiber”.

Mixed orders are always available at Custom Door Components.
